Ai Sitemaps – Get a better presence within the search engines and keep them updated about your website

Whatever the scale of your business, your budget or your needs, Ai Sitemaps will help you to succeed.

If you own a website then XML Sitemaps are something you can't afford to ignore.

Our Ai Sitemaps packages give you a guaranteed up to date XML sitemap that will be retained within your website directory. We will also inform the search engines of where the file lives and how to find it for maximum speed and exposure. For more advanced packages we also submit the sitemap to the major search engines to ensure an even quicker safeguarded process.

A sitemap encourages search engine spiders to crawl your site and to rank it in the search engines. An XML sitemap makes it possible for a website to get listed and get updated quickly and effectively by a search engine.

Setting up our XML sitemap means that not only will you get a better presence within the search engines, but it also drastically increases the time to inform search engines of any updates or additions of the web pages within your site.

So why is a sitemap important?

Sitemaps are key to visibility!

A website that is completely indexed has better chances of **getting top search engine placement** in the Google (and other search engines) organic page results. Google Sitemaps enables us to directly alert Google to changes and additions on your website.

Google   bing   YAHOO!
